

MEGA VIEW UV40 105

Thanks to the innovative micro-perforation pattern, the film not only ensures excellent contrast but also delivers outstanding print quality. This enables precise and vibrant reproduction of graphics and images, making the final result more visually appealing and impressive. The fine micro-perforation pattern also enhances colour intensity, helping your messages and designs stand out even more.

Durability

Up to 2 years in mid European conditions. Clean removal within 6 months. Tack may increase over time. Not to be applied on: fresh paint or ink, polycarbonate, certain PVC (no exhaustive list). For critical substrates, please test prior to application.
